

BUILDING REGULATIONS for ELECTRICAL INSTALLATIONS in DWELLINGS

CITY & GUILDS 2393 – 10 (Level 3)
£215 vat inc.

This is a short, 1 day or 3 evenings course developed for all operatives involved with electrical work in dwellings.

The aim is to allow candidates to gain a knowledge and understanding of how electrical installations **must** comply with all the relevant Building Regulations.

This is a useful addition to both 17th Edition and Inspection and Testing qualifications and to an operatives CV.

The assessment is a 20 question, open book, on-line multiple-choice test based on the NICEIC/ECA and/or IET Electrical Installers guides to the Building Regulations. The course fee includes the provision of a copy of the NICEIC/ECA guide.
