

# Solar PV Installation

## City and Guilds 2399

£800 vat inc.

This five day City and Guilds course (1 day a week for 5 weeks), is conducted in both classroom and practical 'on roof' environments.

Successful completion of this course will enable candidates to be in a position to apply for MCS registration.

The course covers the following topics

- Micro-renewable energy technologies
- Health and safety / working at heights
- Solar energy
- PV components and systems
- On-Grid and Off-Grid systems
- System safety
- PV calculations
- MCS requirements
- 2, On-line multiple choice assessments
- Practical assessments

A light lunch is provided.

Candidates will be expected to have 17<sup>th</sup> Edition (C&G 2382-10) and testing (C&G 2392-10 or 2391-10) qualifications.

Those wishing to register with the MCS will need to demonstrate their competence in paperwork/administration to the MCS assessor. We offer a Quality Management Skills (QMS) course for those who do not have such skills. (see our QMS course pamphlet)

Please contact us for further details and available dates.
