

QMS

£150 vat inc.

Experience has shown that many PV installers wishing to become MCS registered have been rejected on their paperwork and administration skills which are deemed to be of considerable importance.

This one day Quality Management Skills course is designed to give candidates the knowledge and aptitude to complete the complex MCS paperwork.

Topics include:

- Quality policy
- Quality systems
- Compliance
- Design control
- Document control
- Receiving information
- Production and measuring equipment
- Quality control
- Complaints

A light lunch is provided.
